## HD Systems Integration

### *Home Page*

### **HD Systems Integration**

*We take the mystery out of technology.*

### **Electronic Systems Design and Installation**

Are you in search of the perfect, customized home theater? Do you need a reliable security system for your home or office? Would you like to take advantage of cutting-edge technology in wiring your home for audio?

HD Systems Integration has the electronics knowledge, expertise, and professionalism you're looking for.

We'll help you choose electronics that fit your lifestyle and budget, and then we'll install them for you with meticulous attention to detail. Plus, we'll give you a single remote control and a one-on-one training session to make sure you know how to use your system without having to read through complicated user manuals.

### **Design**

Our [home theater](#) designs are customized to fit your space, style, and budget. We'll work with you to determine the best solution for your living space and then we'll help you choose the right TV, components, and speaker placement for your home theater.

### **Installation**

We back all of our installations with a 100% satisfaction guarantee. Our attention to detail ensures the best possible speaker placement and projection and top of the line, highly functional security systems. You'll be able to relax while enjoying your home theater, and you'll sleep soundly knowing that licensed professionals installed your [security system](#).

## **Programming and Training**

Who needs a big pile of remote controls? All of our designs and installations operate on a single remote. Best of all, you won't have to read any manuals because we'll personally show you how to use your system and the remote that controls it.

## **Security**

Protect your home or business with a security system designed with your safety in mind and installed by highly trained professionals. All systems are top quality and easy to use. We'll work closely with you to help you choose the system that provides the safety and security you need.

## **Meet Our Team**

We believe that the best service is personal service, so we work closely with all of our clients. We pride ourselves on being experts in electronics and also for our friendly, professional service. Plus, at HD Systems Integration, we always offer competitive pricing. Visit our [services page](#) to learn more about the many services we provide for residential and business applications.

## **About Us**

HD Systems Integration is a locally owned, small business based in Western Massachusetts, serving residents and businesses that need help choosing, setting up, installing, and managing their consumer electronics.

Founder and President of HD Systems Integration, Jayson P. Lacasse, has been in the electronics industry since 1996. In 2006, Jayson established HD Systems Integration. Since then, Jayson and his team have been providing high quality, customized security and home theater design, installation, programming, and training as well as a number of other electronics-related services.

**Mission Statement:** Get it installed and set up

We help customers find the most ideal system or solution available, and then install it on time and within budget. We want our customers to be comfortable with the equipment we install, so we show all clients how to use their new systems. We maintain our knowledge through ongoing training to ensure that we are always up to date with the latest technologies, techniques, and practices.

## **Philosophy:**

We understand that our customers are the driving force behind our business. Our objective is to provide the very best in professional and courteous service as well as competitive pricing. We conduct all business with a clear commitment to ethical conduct using six basic principles:

- Be trustful
- Keep an open mind
- Meet all obligations
- Maintain clear documentation
- Be involved in the community
- Be respectful at all times

## ***Why Choose Us***

HD Systems Integration takes the mystery out of technology.

## **Electronics Experts**

At HD Systems Integration, we're passionate about technology. We track trends, developments, and the latest electronic products on the market so we can help you choose the best security system or home theater components based on your lifestyle, home size and space, and budget.

## **Personalized Service**

We interview all of our clients carefully and thoughtfully to make sure we understand their personal needs and requirements. Then we find the products that are a perfect match for our clients' individual needs.

Every system is custom designed to tailor fit our customers' homes or offices and the installation techniques we use have a minimal impact on day-to-day activity at the job site. We are always conscious of our clients' comfort.

We show all of our clients how to use their new electronics through a straightforward training session. We read the user manuals, so you don't have to.

## **Competitive Pricing**

All of our products and services are priced competitively. As a small, locally owned business, customer service is our top priority, and fair, competitive pricing is an essential component of quality customer service.

Our team members and associates are professional and courteous, and the products we sell are cutting edge. Part of our job is to ensure that every one of our customers has an excellent experience working with HD Systems Integration. Your happiness is our success!

## **Services**

HD Systems Integration offers a suite of products and services to enhance the electrical wiring and electronic components in your home or office. From state-of-the art home theaters to top of the line security systems, we're ready to fulfill your electronics needs.

**Alarm Systems** - Our alarm systems keep your family safe at home and your valuables safe at the office. We offer a number of product options and expert installations by licensed professionals.

**Camera Systems** - Enhance the security in your home or place of business with a camera system that discourages intruders and captures activities around the premises on video that can be easily accessed from anywhere in the world.

**Intercom** - Instant communication and added security are accessible with a comprehensive intercom system, including systems that feature video feeds, so you can screen visitors, monitor the premises, and remotely unlock doors.

**Home Theater** - Get a home theater that offers the very best in entertainment. We'll design and install the entire system, and then show you how to use it with a single, universal remote control.

**Whole House Audio** - We bring all of your audio systems together to create a single audio system that is wired throughout your home. Each room is equipped with speakers and a universal remote control. Different audio feeds can play in different rooms simultaneously.

**Structured Wiring** - We organize cable and/or satellite video lines, phone lines, computer network lines and cables throughout your home or office, streamlining them into a safe and tidy system connected efficiently and professionally through a series of wall plates and a master control panel.

## ***Whole House Audio***

You have a stereo in your living room, an iPod in your bedroom, and a satellite radio in the garage. Some of your music is on CD; some of it's on your computer. Sometimes you want to listen to a particular album, but then you'd have to move to a different room in your house.

Modern technology allows you to connect all of your audio electronics, joining them together in a single system that can be accessed, controlled, and enjoyed from any room in your house. Best of all, this system allows different audio to stream into different rooms simultaneously.

HD Systems Integration offers the very best components and installation in whole house audio. We'll connect all of your electronics, implementing a cutting-edge system that is customized for your home, including outdoor areas.

Imagine—your digital music, CDs, and the radio—all of your audio components connected in one system, accessible from every room and by everyone in your home. One family member can entertain on the patio to the sounds of rock and roll while another relaxes to smooth jazz in the bedroom.

It all starts with a simple consultation. Our experts will meet with you at your location to establish your whole house audio needs. Then we'll get to work designing a whole house audio system that reaches out to every room and person in your home.

Call us today to get started: **(413) 642-0379**

## *Home Theater*

Is your home entertainment system working for you?

Are your wires tangled up and exposed? Sound not getting to one of your speakers? Are you frustrated by multiple remote controls? Has enjoying a bit of music or a movie become a chore?

There's no point spending your money on audio and video components if you can't enjoy them properly or if their features are too confusing to use. You need a home theater that works for you—one that's easy to use and offers high quality audio and video.

HD Systems Integration has the expertise in technology and electronics to build a home theater that you and your family can easily control and happily experience. We can design a new home theater from the ground up or we can redesign your existing system.

All of our home theater designs are customized for your living space and for your lifestyle and personal needs, including your budget. Our home theater installations are clean—all the wires will be neatly hidden away out of sight. Best of all, you'll get a single remote control, and we'll make sure you know how to use it!

Home theaters include a big screen television or projector, surround sound speakers, a receiver, and a video player. HD Systems Integration makes sure all of these components connect smoothly and work perfectly.

Imagine being able to sit back and enjoy your home theater without any hassle.

## ***Alarm Systems***

You've worked hard building your business, and your home is your personal haven. You want to protect your business and your home by keeping your assets and your family safe from intruders.

A security system will provide the protection you need. Security and alarm systems are affordable, preventative measures you can take in protecting your valuables, including loved ones. Plus, by installing a security system, you could save up to 20% on your property insurance.

HD Systems Integration has the expertise to help you determine which system best suits your needs. We work with a wide range of security systems and can counsel you on the benefits of each, and then help you choose one that will ensure your safety.

We'll install your system quickly, efficiently, and effectively, and we'll set it up without disturbing the daily activities at your home or office. Then we'll show you how to use your system so you can be confident in your investment.

Once you've hired us to set up your security system, we believe it's our job to make sure you're protected while you're at home or while you're away, and we take that responsibility seriously.

Let a team of licensed professionals guide and assist you in protecting your home or office.

## *Structured Wiring*

Have you ever examined the wiring in your home or office? If you look behind the walls, you might find stray or loose wires, cables, or phone lines. Does it look like an electronics store exploded in your basement? Sloppy wiring is not pretty, certainly not convenient, and may not be safe.

Structured wiring involves cleanly running and labeling all wires, cables, and lines throughout a building to an orderly electrical box. Loose wiring in the walls, basement, or attic are reorganized and connected through wall plates that are placed strategically throughout the home or office.

HD Systems Integration offers structured wiring for all low-voltage electrical lines, including cable, phone, and computer (internet connections, such as cable or DSL). The lines are safely connected, neatly organized, and clearly labeled.

In some cases, loose or exposed wires may present safety hazards, with risks that include tripping, accidentally dismantling the wiring that is in place, and at worst, poor wiring could present a fire hazard.

Make sure the wiring in your home or office is safe and secure with HD System Integration's structured wiring services. Our technicians are licensed, experienced experts in their field.

Call us today to discuss how we can improve the wiring in your building: **(413) 642-0379**

# BUZZ PRO STUDIO

---

## *Intercom*

Instant communication doesn't have to involve yelling through the walls to call the family for dinner, and it's not necessary to get up and trek through the office for a meeting or even to ask someone in another office (or building) a simple question.

Intercom systems allow you to communicate instantly throughout your home or office. Whether you need to give someone a brief message or quickly deal with a sudden emergency, intercom systems make communication fast and effective.

HD Systems Integration offers intercom systems built with the best hardware and circuitry available. We offer plenty of options in models and accessories and can advise you on the intercom system that best suits your needs at home or at the office.

Imagine having the ability to communicate instantly with the touch of a single button. Get an intercom with video and use it to screen visitors, monitor the baby, or to enhance your security or alarm system.

All of HD Systems Integration's intercom installations are easy to use, and we offer a wide range of features and accessories, all of which improve security and communications.

Want to learn more about installing an intercom in your home or office? Give us a call: **(413) 642-0379**

## ***Camera Systems***

Nothing thwarts a thief like a security camera. Security systems that use alarms are effective for preventing security breaches, but camera systems go a step further by recording the goings-on around the premises to divert and capture questionable or illicit activities.

A closed-circuit camera system closes gaps in traditional, alarm-based security systems. Using strategically placed cameras to record video footage, camera systems capture not only intruders, but also internal breaches. More importantly, such systems discourage undesirable behavior, such as employee theft.

HD Systems Integration provides a wide range of camera systems. We can install a simple residential system or a large-scale, commercial security camera system with multiple locations that are managed remotely from anywhere in the world. Our expertise in the security field allows us to help our clients choose the ideal system and get it installed by licensed professionals.

Few security systems offer the assurance of a comprehensive, closed-circuit camera system in which recordings provide added safety against wrongdoings. When you capture an intruder or violator on camera, the evidence is rock-solid.

Remember, nobody wants to be caught on tape! With a security camera system, you'll feel more safe and secure than ever.

Call us today to learn how a camera system can increase the security in your home or office:  
**(413) 642-0379**
